

CENTURION RACK REPAIR SOLUTIONS

**REPAIRING DAMAGED
UPRIGHTS HAS NEVER
BEEN EASIER.**

Introducing the Centurion™ Rack Repair product line, a revolutionary breakthrough in pallet rack maintenance and repair by SpaceGuard Products. This comprehensive collection, including the Centurion™ Low Guard, Mid Guard, High Guard, VanGuard, and Row Guard, alongside adjustable bracing, is meticulously engineered to transform the landscape of pallet rack systems.

The hallmark of innovation lies in its adaptability and modular design, enabling users to tailor rack protection to their unique storage facility needs.

CENTURION PRODUCT LINE

ROW GUARD

Protecting your rack against side impact, the Row Guard is a preventative solution to replace the traditional, industry standard end-of-row guards. It protects and repairs both front and rear uprights. Gain back valuable square footage in your facility! Custom made to fit your size of racking.

LOW GUARD

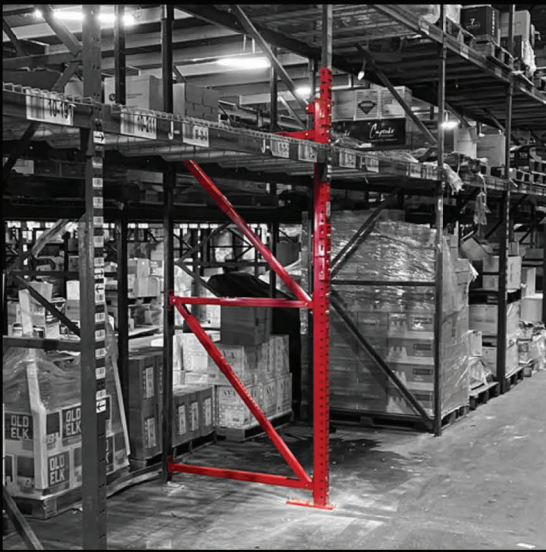

Dedicated to the bottom 16" of the upright and made to fit 3", 4" or 5" uprights. The Centurion Low Guard is the best, most cost-effective, heavy-duty solution for damage to the bottom of the upright or at the base plate.

MID GUARD

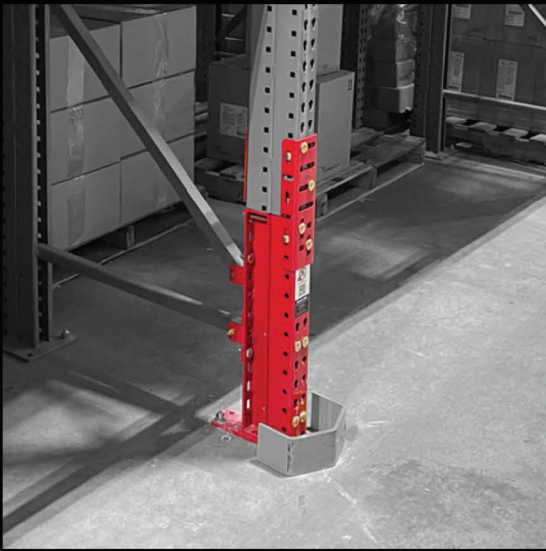

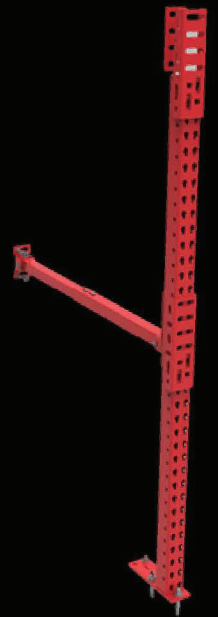

Choose from teardrop and structural hole patterns and enjoy the flexibility of adjustable braces. Plus, our solid tube frame can be easily customized to your preferred height (up to 84") and fits 3", 4" and 5" uprights.

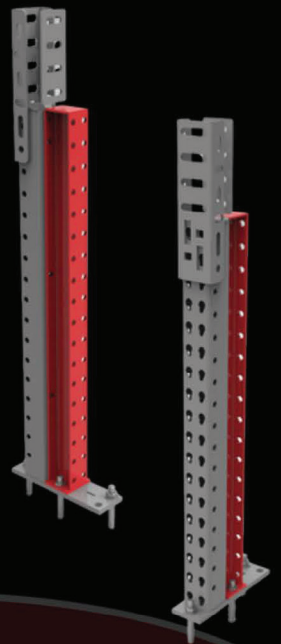

HIGH GUARD

The High Guard is an extension added to Mid Guard and extends the repair assembly up to 13'.

VANGUARD

Available for additional durability or replacement of a double reinforced column. The VanGuard is an add-on product that provides additional depth to extend the back column and increase the impact resistance of racking.

CENTURION

WHY CHOOSE CENTURION™?

EXTEND THE LIFE OF YOUR PALLET RACK UPRIGHTS

Engineered to repair damaged pallet rack uprights, saving you the cost of replacement while fortifying against future impacts, enhancing overall resilience.

CUSTOMIZABLE HEIGHT

The solid tube frame is easily adjustable in the field to match your preferred repair height and seamlessly finished with our convenient drop-in top cap for a smooth installation.

ADJUSTABLE BEAM RECONNECTION

Centurion™ is the industry's sole solution crafted for secure beam reconnection, offering adjustability without the need for drilling or modification (for both teardrop and structural rack systems).

INNOVATIVE COMPATIBILITY

The Centurion™ Cuff revolutionizes compatibility by eliminating the necessity for in-field reaming, ensuring compatibility with 99% of uprights.

EFFORTLESS BRACING CONNECTION

The inventive beam dodger plates simplify the bracing connection process, eliminating the requirement to shift beam positions.
